TĂLPĂU MIRCEA-CRISTIAN

Software Developer

ABOUT ME

Currently I am studying web technologies and databases (SQL and .NET), and I have experience working with Angular.I am a hardworking and dedicated person, always seeking new challenges and eager to learn new things. I am capable of working efficiently both independently and as part of a team, and I am determined to produce superior quality code.

SKILLS

- **Proficiency in understanding and writing English language: Advanced** - I have acquired solid skills in understanding and writing documents in English at an advanced level.
- **Ability to work in a team** - I've participated and I'm currently participating in projects within the faculty and developed collaboration and communication skills with colleagues, being open to ideas and suggestions from them.
- **Ability to handle situations that are unforeseen or not within my area of knowledge** - I have learned to quickly adapt to changes and improve my knowledge through individual study and by seeking the help of colleagues or professors.
- **Effective time management** - I have developed skills in organizing and prioritizing tasks during college so that I can successfully complete goals within set deadlines.
- **Ability to efficiently solve problems** - I have developed an analytical and creative approach to identifying and solving problems, based on my own knowledge and further research.
- **Good communication skills** - I have acquired strong communication skills through participating in team projects and presenting ideas in front of colleagues and professors.
- **Ability to work under stressful conditions** - I am capable of maintaining my composure and prioritizing tasks in high-pressure situations.

PROFESSIONAL EXPERIENCE

SOFTWARE DEVELOPER INTERN
BANCA TRANSILVANIA 07/2023 - 08/2023

-I have worked and followed the **SCRUM** methodology
